truth ink only
answer ink only
both (counts as agreement)
offset δ = 0 px
soft IoU = 1.000
offset δ = 2 px
soft IoU = 0.778
offset δ = 4 px
soft IoU = 0.600
offset δ = 8 px
soft IoU = 0.333
offset δ = 12 px
soft IoU = 0.143
IoU is hyperbolic in the offset, Dice linear; both use the same overlap
agreement
band offset δ (px)
soft IoU (the region term)
hard IoU (threshold at 0.5)
Dice (also reported)
closed form (w − δ)/(w + δ)
why soft: hard IoU is a staircase
band offset δ (px, sub-pixel range)
soft IoU
hard IoU
